

HITARTH GUPTA

Senior Frontend Engineer | React.js & React Native

India | +91 701473 6673 | hitarthgupta1@gmail.com | LinkedIn: <https://www.linkedin.com/in/hitarthgupta03/>

Professional summary

Senior Frontend Engineer with **5+ years of experience** building **scalable, high-performance UI** across fintech and e-commerce platforms. Expertise in **React.js, React Native, TypeScript, Redux**, and **Node.js integrations**, with strong experience consuming **RESTful APIs** and managing complex application state. Experienced with **GenAI-assisted development workflows (GitHub Copilot, ChatGPT, Claude)** to accelerate delivery and maintain code quality. Strong focus on **performance optimization, clean architecture, CI/CD practices**, and delivering **seamless user experiences at scale**.

Skills

Frontend Technologies: React.js, React Native, React Navigation, JavaScript (ES6+), TypeScript, CodePush (OTA Updates), Firebase (Auth, Firestore, FCM), HTML5, CSS3, Tailwind CSS, Styled Components

State Management: Redux (Thunk, Saga), Redux Toolkit, RTK Query, Context API

Backend & API Integration: Node.js, REST APIs, GraphQL, WebSocket

DevOps & Tools: Git, Azure DevOps (ADO), Android Studio, Xcode

Testing: Jest, React Testing Library, Unit & Integration Testing

Generative AI Tools: GitHub Copilot, ChatGPT, AI-assisted code refactoring, AI-assisted debugging

Work history

Senior Associate

05/2025 to 01/2026

PwC – Gurgaon, India

- Developed scalable enterprise web applications using React.js and TypeScript reusable UI component, for a global food and beverage leader supporting high-traffic workflows.
- Applied JavaScript (ES6+) patterns — closures, async/await, event loop optimisations — for high-performance UI flows.
- Leveraged GenAI tools (GitHub Copilot, ChatGPT) to accelerate feature implementation and reduce development effort by ~30% while maintaining code quality standards.
- Collaborated with DevOps teams to streamline CI/CD pipelines on Azure DevOps and optimised production release workflows across a team of 6.
- Worked on Redux Toolkit (RTK) state management and API-driven UI workflows at enterprise scale.
- Driving development within Agile/Scrum environments, actively participating in sprint planning, reviews, and retrospectives to ensure on-time and iterative delivery.

Consultant (React Native Developer)

02/2024 to 05/2025

StatusNeo – Gurgaon, India

- Contributed to YES Bank IRIS — a React Native mobile banking app serving 400K+ active users — across credit card onboarding, debit card management, bill payment, and prepaid services modules. (**Project Link:** [IRIS by Yes Bank](#)),
- Enhanced credit card onboarding and dashboard flows, improving completion rate by ~25% through streamlined UX and optimised async state transitions
- Improved mobile app stability and screen render time by 20% via FlatList optimisation, memoisation, and elimination of unnecessary re-renders — measurably improving Crashlytics session reliability
- Applied JavaScript (ES6+) async patterns (Promises, async/await) for smooth fintech UI flows aligned with RBI compliance guidelines

Wrote unit and integration tests using Jest and React Testing Library, achieving 80%+ module coverage across mobile banking features.	
Senior Developer Neoma Services Private Limited • Developed e-commerce frontend modules using React.js, GraphQL, and Node.js for a Hong Kong-based platform, owning end-to-end ordering workflow UI. (Project Link: OnTheList). • Architected real-time product data interfaces with API-driven architecture leveraging WebSocket and JavaScript (ES6+) async patterns, reducing data latency by 35% • Reduced page load time by ~30% via code splitting, lazy loading — improving Lighthouse performance scores from 58 to 82 • Implemented Over-the-Air (OTA) Updates via CodePush and mini-app architecture and accelerating the release cycle • Optimised GraphQL query batching and minimised unnecessary re-renders, cutting API response overhead by 25%.	02/2023 to 01/2024
Software Developer Dev Technosys Pvt. Ltd. – Jaipur • Built 7+ React Native and web applications across e-commerce, travel, healthcare, and food delivery domains for Android and iOS platforms. (Project Link: Birlingo, SOC) • Integrated Maps SDK with auto location detection using memoisation techniques and powering vendor discovery features • Integrated payment gateways and in-app purchase modules (Android and IOS) with webhook support for real-time transaction processing • Designed Single Page Applications using modular React architecture, improving code maintainability and reusability across 2+ client projects • Wrote unit tests, conducted code reviews, and mentored 2 junior developers on React Native best practices and component design patterns.	01/2021 to 12/2022
Education	
Bachelor: Computer Application JECRC University - Jaipur	05/2020
Certifications	
Salesforce Certified Agentforce Specialist	01/2026
